

FAASTeam presents:

Rusty Pilot Seminar

Haven't flown for a while? A really long while? It's a pretty common tale in aviation. A pilot gets his or her license then something in life intervenes to interrupt flying, sometimes for years at a time. Skills atrophy. Confidence erodes. They pilot becomes "rusty". But the dream of someday getting back into the air lingers, waiting to be fulfilled.

Until now. It's time for all Rusty Pilots to shake off the cobwebs and build a pathway back into the air. Summer skies in the Bay Area are calling and people of San Carlos Flight Center are here to help you answer that call. Join us and together we will go over the steps you'll need to take to get back into the PIC seat.

We'll discuss how certification requirements have changed, overview the changes to the FARs in recent years, and outline a path that we regularly use at San Carlos Flight Center to return Rusty Pilots to fully-oiled PIC competency. We hope you will join us.

Note: The seminar is a high-level overview and won't provide answers to individual-specific situations. If you'd like 1-on-1 answers, you are encouraged to contact the Flight Center and ask

Event Details

Sat, Jul 20, 2013 - 12:30 pm

San Carlos Flight Center

655 Skyway Rd

Suite 215

San Carlos, CA 94070
